YOU WANT *Lifetime Beauty* IN

YOUR GARDEN

**THEN BE SURE THE PEONY
ROOTS YOU PLANT ARE**

Perfect

One of the most beautiful of flowering plants, the Peony is also among the longest-lived. **Alone** among flowering perennials the Peony has been known to live and bloom for a century—and even longer. You can have this matchless beauty in your garden . . . for life . . . for a few cents a year.

Because the peony lasts a lifetime, you must choose carefully the roots you plant. Remember, you don't buy a grown plant, one you can see and compare. You buy a root.

The following pages of this folder show you the difference in roots, tell you how to make sure the roots you buy are as perfect as peony roots can be!

WHEN YOU BUY PEONY ROOTS

THIS ROOT MAY GROW

● Notice the small size, the lack of full, firm flesh. Only one major eye. Evidence of careless cutting. This peony MAY grow, yes, but it's much more likely to die. If it does grow it may not bloom the first year, may be weak and dwarfed for many years. Yet every year people buy thousands of roots no better than this.

NO CHANCE FOR THIS ONE

● Not dug to order, but dried and withered in storage between digging and planting. Not a single major eye in this "bargain" division! Notice how it compares with the big, healthy Auglaize LIFETIME Peony Root in the center circle.

BUT YOU CAN ORDER FROM AUGLAIZE GARDENS...AND BE SURE!

● Every Auglaize Root division is taken from a strong, vigorous three-year-old plant. These plants have been nurtured for propagation purposes only. It's the slowest, most costly method—but it's the only way lifetime strength and flawless beauty can be stored in a plant root. You get these features in every Auglaize root: FIVE MAJOR EYES; FIRM, FULL FLESH; FRESHLY DUG FROM CLEAN, IRRIGATED THREE-YEAR-OLD STOCK; CAREFULLY DIVIDED, and TRUE TO NAME AND TYPE.
